

# ANT-245GHZ

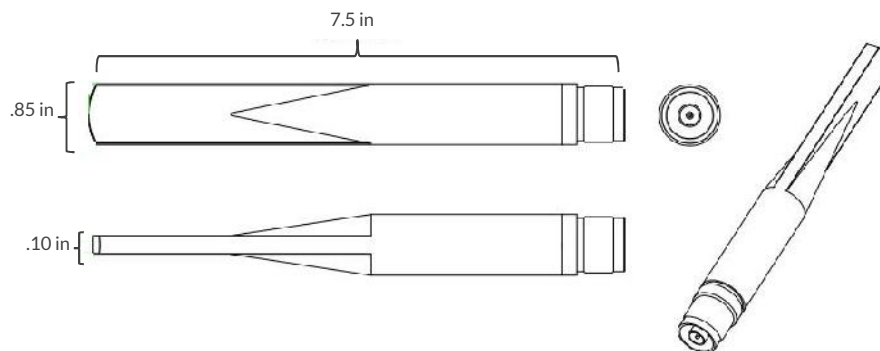

## Dual band high performance 7dBi outdoor antenna

ICCN's ANT-245GHZ outdoor high performance dual band antenna in a durable small duck antenna form factor. It is designed for easy-of-use and connects directly to the access point without the need for additional cables. The ANT series are dual polarity antenna systems that feature simple to mount hardware, easy to use components, and all weather-resistant parts. Featuring a direct connect N-Male connector, this antenna is perfect for high speed line of sight MIMO performance of IEEE802.11ac or IEEE802.11n technology.

### Product specifications:

Frequency	2400-2500 MHz 5150-5350 MHz, 5850 MHz
Gain	7dBi
Max Input Power	100 watts
Impedance	50 ohm
Connector Interface	Direct connect N-type Male
Weight	.5lbs

**ANT-245GHZ**  
2.4GHz & 5.8GHz (dual-band) 7dBi omni directional antenna with an N-Male connector designed for indoor or outdoor use
