CLOUD MANAGEMENT SYSTEM

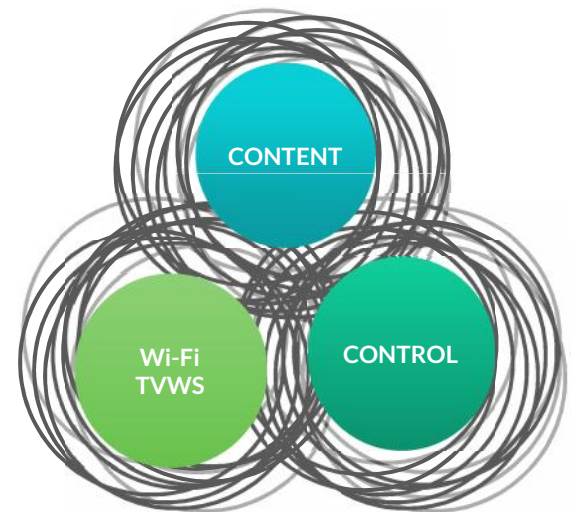

activeARC Cloud Management System

Visibility. Flexibility. Efficiency

ICC Networking's activeARC CMS is a robust device, content, and access management platform. When deployed with the Unified Access Device Wi-Fi solution or our TV Whitespace technology, users experience the power of an ICCN unified wireless communication solution.

activeARC CMS clients can scale networks from small to large enterprise without limitations. The system provides a layered approach to UAD deployments since each deployed device is hyper intelligent and can be controlled using different management tools. activeARC CMS is the ultimate hybrid environment allowing cloud controlled management to be extended into cloud wireless management and access control.

Key Points

Management

- Device Provisioning
- Zero touch Deployment
- Monitoring and Diagnostics
- Customer Account Management
- Cloud Service User Management
- Device Firmware management
- Radio/VLAN/QoS Configuration
- Site/Group/Tenant Creation
- HTTPS Secure Connection
- Email Notifications
- Device inventory management

Virtual Device Mode

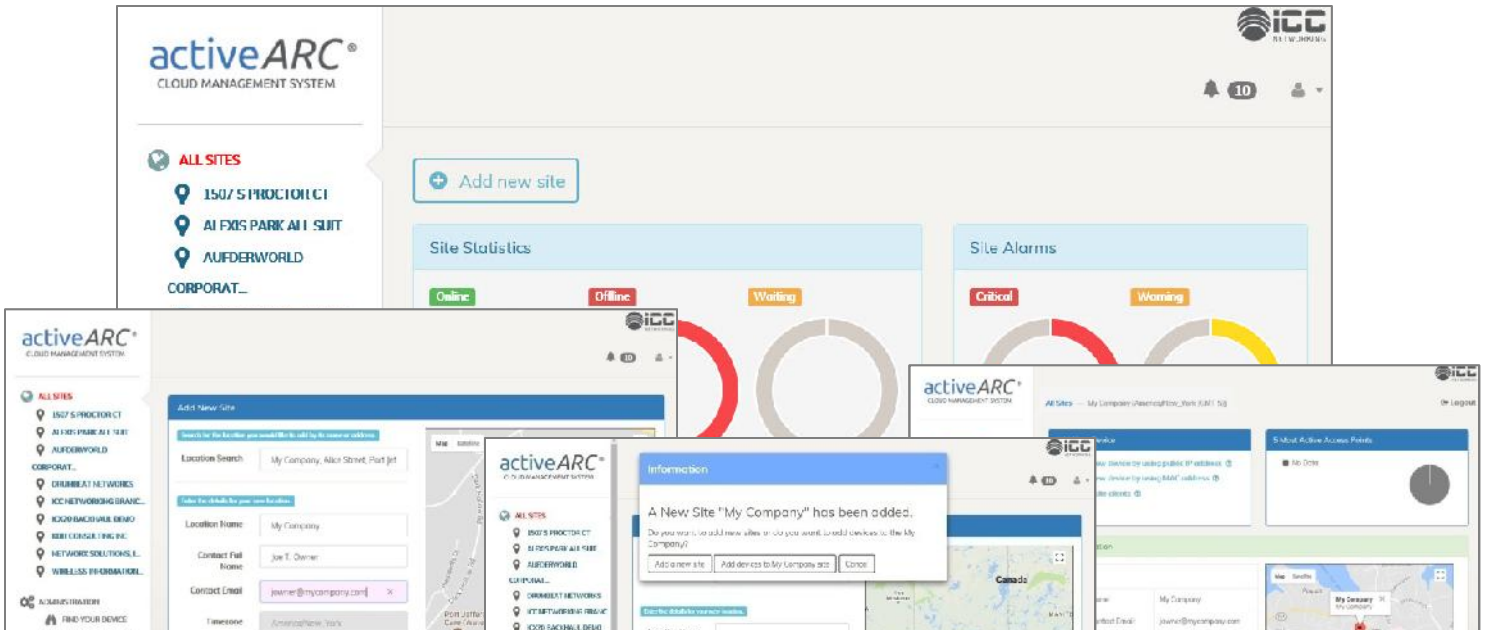

- Access Point
- NAT/Router
- Basic Firewall
- DHCP and Captive Portal
- Client Device
- Monitoring Device

activeARC Cloud Management System

Visibility. Flexibility. Efficiency

activeARC[®]
CLOUD MANAGEMENT SYSTEM

Scalable hyper-intelligent mobility ecosystems

ICCN's activeARC CMS is designed for simplicity, secure access and virtual control of the wireless infrastructure to deploy advanced features for access, device management, content control, application optimization, security, and a host of features that support an intelligent wireless edge network design.

Key Points

Deployment

- UAD – AE & AX series
- Unified Wi-Fi & TVWS
- Secure & Separated Guest Access
- Global Deployment Strategy

Security

- Multi-tenant System
- Industry-leading Cloud Security
- Resilient Cloud System
- Securely Segregate Device Access

Industry-leading Return-on-Investment

- activeARC CMS Included in Purchase of Device for 5 Years
- Seamless Transition as New Technology Devices are Added to the Network
- Enterprise and Service Provider Cloud System included in Device Maintenance Agreement
- Legacy (beyond 5 yrs) Device Support (maintenance fee applies)
