

ANT-CABLE-4

4ft LMR-240 Coax cable with N-Male to N-Male Connector

ICCN's ANT-CABLE-4 outdoor high performance LMR240 cable assembly with N-Male to N-Male connectors is designed for low loss flexibility. Designed to be used with ICCN's Unified Access Devices for outdoor deployments, the ANT-CABLE-4 ship with two cable assemblies.

Featuring support for the two N-Female ports on the ICX20 series access points, one for vertically polarized and one for horizontally polarized signals, the ANT series is perfect for high speed line of sight MIMO performance of IEEE802.11ac or IEEE802.11n technology.

Product specifications:

- The ANT-CABLE-4 is a high quality 240 coax cable
- Designed for high performance, it has low loss characteristics
- Fully tested and ships with two units, one for each polarized port per RF

ANT-CABLE-4

4ft (122cm) LMR240 pigtail cable N male to N male connector. Shipment includes two (2) cable assemblies.
